

CMF-N202

Online PH Sensor

The PH sensor for measuring pH value should be a good solution with professional display instrument, calibration problems such as complicated, expensive and difficult to carry. This product can be used for continuous on-line monitoring of the pH of liquids.

FEATURES

- On-line & real-time measurement
- Internal signal isolation technology, strong anti-interference
- High accuracy
- Easy to operate and install
- Fast response
- Stable performance

SPECIFICATIONS

Item	Technical Specification
Range	0-14
Accuracy	±0.02
Resolution	0.01
Supply	7-30V DC
Output	RS485
Sensor Drift	≤0.01pH/24h
Response Time	≤8s (98%Flowing liquid); ≤14s (98%Still liquid)
Operating Environment	0°C-+70°C, <0.6MPA
Ingress Protection	IP68
Cable Length	Standard 5m
Shell Material	ABS

ACID AND ALKALINITY

“Smart Farm”
